Art Unit: 1725

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 72-134, 145-159, drawn to an apparatus, classified in class 422, subclass 139.
  - II. Claims 135-144, drawn to a method, classified in class 48, subclass 62.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be used with sand reclaiming.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

### **If applicant elects group I, applicant must additionally elects the following:**

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 1725

- Ia. Claims 72-79 pertains to a fuel gasification chamber.*
- Ib. Claims 80-85 pertains to a topping combustion.*
- Ic. Claims 86-96 pertains for pyrolysis.*
- Id. Claims 97-106 pertains to strong and weak fluidized region.*
- Ie. Claims 107-117 pertains to strong region near opening in the char combustion, weak region in the gasification chamber.*
- If. Claims 118-134 pertains to a fluidized median withdrawn from gasification chamber.*
- Ig. Claims 145-154 pertains to gasification chamber and char combustion chamber divided by another partition wall.*
- Ii. Claims 155-159 pertains to a gas diffuser below gasification chamber and char chamber.*

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1725

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Inquiry***
